

ANA to Introduce Boeing 767 Freighters for Flights Between Hangzhou and Tokyo

- In response to increased demand, ANA will employ Boeing 767 freighter to connect Hangzhou and Tokyo in June.

TOKYO, June 8, 2021 – All Nippon Airways (ANA), Japan's largest and 5-Star airline for eight consecutive years, will operate cargo freighters connecting Hangzhou Xiaoshan International Airport (HGH) and Tokyo Narita International Airport (NRT) for two round trip flights in June. A Boeing 767 freighter with maximum load capacity at roughly 50 tons has been selected for the route.

ANA is operating the freighters in response to increased demand for transportation of cargo with growth of cross-border e-commerce, and in addition aims to further support the global supply chain network by responding to a broad range of demand for transporting cargo such as electronic devices to North America and Europe.

“ANA places the same emphasis on superior customer service for our cargo flights that we do on flights transporting passengers. We understand that air transportation represents a vital link in the global supply chain, and it is encouraging to watch our network grow as the economy begins to recover,” said Toshiaki Toyama, Executive Vice President of ANA and President of ANA Cargo Inc. “Hangzhou represents a vital industrial hub, and we are excited to offer a direct link between the city and the Japanese market.”

Flight schedule:

Route	Flight Date	Flight Number	Schedule
Narita - Hangzhou	June 20,27	NH8529	Narita(23:00)/Hangzhou(1:45+1)
Hangzhou - Narita	June 21,28	NH8530	Hangzhou(4:05)/Narita(8:20)

*The announced plan above is subject to the approval of relevant authorities.

While adjusting our services to meet the changing market conditions and strong demand for cargo, ANA will operate more than 2,000 cargo flights using freighter and passenger aircraft in June. ANA is committed to using its fleet of two Boeing 777 freighters and nine Boeing 767 freighters to meet demand and facilitate international commerce. Over the past year, ANA's cargo operations have helped maintain global supply chains.

About ANA

Founded in 1952 with just two helicopters, All Nippon Airways (ANA) has grown to become the largest airline in Japan. ANA HOLDINGS Inc. (ANA HD) was established in 2013 as the largest airline group holding company in Japan, comprising 71 companies including ANA and Peach Aviation, the leading LCC in Japan.

ANA is a launch customer and the largest operator of the Boeing 787 Dreamliner, making ANA HD the biggest Dreamliner owner in the world. A member of Star Alliance since 1999, ANA has joint venture agreements with United Airlines, Lufthansa German Airlines, Swiss International Airlines, Austrian Airlines and Brussels Airlines – giving it a truly global presence.

The airline’s legacy of superior service has helped it earn SKYTRAX’s respected 5-Star rating every year since 2013, with ANA being the only Japanese airline to win this prestigious designation for eight consecutive years. ANA also has been recognized by Air Transport World as “Airline of the Year” three times (2007, 2013 and 2018); it is one of only a select few airlines to win this prominent award multiple times.

ANA is the only company in the aviation industry to receive the Gold Class distinction from the 2021 S&P Global Sustainability Awards and ANA HD has been selected as a member of the Dow Jones Sustainability World Index list for the fourth consecutive year and the Dow Jones Sustainability Asia Pacific Index list for the fifth consecutive year.
